CIA Headquarters Expansion, Langley, Virginia, Change Over
Old (Cond. Water) to New

Gentlemen:

Reference is made to your projected sequence for accomplishing the above transition as outlined in your letter of November 22, 1985.

The plan looks good to us, and we appreciate the start that has been made so far. The condenser water shutdown required to isolate RM #7 will have to be arranged through the Agency. However, there shouldn't be any problem to arrange a short duration shutdown at this time of the year.

We will expect that you will advise us as to the appropriate time for the shutdown.

Sincerely,

Arthur J. Carlucci
